

Oriol Grau-Rivera, MD, PhD

Publications

1. Grau-Rivera O; et al. (2020) Association between insomnia and cognitive performance, gray matter volume, and white matter microstructure in cognitively unimpaired adults. *Alzheimers Res Ther.* 2020; 12(1):4.
2. Vilor-Tejedor N; et al. (2020) Effect of BDNF Val66Met on hippocampal subfields volumes and compensatory interaction with APOE- ϵ 4 in middle-age cognitively unimpaired individuals from the ALFA study. *Brain Struct Funct.* 2020;225(8):2331-2345. doi: 10.1007/s00429-020-02125-3. Epub 2020 Aug 17.
3. Arenaza-Urquijo EM; et al. (2020) Association of years to parent's sporadic onset and risk factors with neural integrity and Alzheimer biomarkers. *Neurology.* 2020;95(15):e2065-e2074. doi: 10.1212/WNL.0000000000010527. Epub 2020 Jul 31.
4. Milà-Alomà M; et al. (2020) Amyloid beta, tau, synaptic, neurodegeneration, and glial biomarkers in the preclinical stage of the Alzheimer's continuum. *Alzheimer's and Dementia.* 2020. <https://doi.org/10.1002/alz.12131>
5. Jecmenica Lukic M; et al. (2020) Copathology in Progressive Supranuclear Palsy: Does It Matter? *Mov Disord.* 2020;35(6):984-993. doi: 10.1002/mds.28011. Epub 2020 Mar 3
6. Falcon C; et al. (2020) Sex Differences of Longitudinal Brain Changes in Cognitively Unimpaired Adults. *J Alzheimers Dis.* 2020;76(4):1413-1422. doi: 10.3233/JAD-200293.
7. Brugulat-Serrat A. et al. (2019) White matter hyperintensities mediate gray matter volume and processing speed relationship in cognitively unimpaired participants. *Hum Brain Mapp.* 2020;1;41(5):1309-1322.
8. Palencia-Madrid L; et al. (2019) A unique common ancestor introduced P301L mutation in MAPT gene in frontotemporal dementia patients from Barcelona (Baix Llobregat, Spain). *Neurobiol Aging.* 2019. doi: 10.1016/j.neurobiolaging.2019.08.015.
9. Operto G; et al. (2019) Interactive effect of age and APOE- ϵ 4 allele load on white matter myelin content in cognitively normal middle-aged subjects. *Neuroimage Clin.* 2019;24:101983.
10. Brugulat-Serrat A; et al. (2019) Patterns of white matter hyperintensities associated with cognition in middle-aged cognitively healthy individuals. *Brain Imaging Behav.* 2020. doi: 10.1007/s11682-019-00151-2.
11. Falcon C; et al. (2019) CSF glial biomarkers YKL40 and sTREM2 are associated with

- longitudinal volume and diffusivity changes in cognitively unimpaired individuals. *Neuroimage Clin.* 2019;23:101801.
12. Salvadó G; et al. (2019). Centiloid cut-off values for optimal agreement between PET and CSF core AD biomarkers. *Alzheimers Res Ther.* 2019 Mar 21;11(1):27. doi: 10.1186/s13195-019-0478-z. PubMed PMID: 30902090; PubMedCentral PMCID: PMC6429814.
 13. Salvadó G; et al. (2019) Spatial patterns of white matter hyperintensities associated with Alzheimer's disease risk factors in a cognitively healthy middle-aged cohort 11 *Medical and Health Sciences 1117 Public Health and Health Services Alzheimer's Research and Therapy.* 11-1.
 14. Cacciaglia R; et al. (2018). Episodic memory and executive functions in cognitively healthy individuals display distinct neuroanatomical correlates which are differentially modulated by aging *Hum Brain Mapp.* 39-11, pp.4565-4579.
 15. Vilas D; et al. (2018) Lack of central and peripheral nervous system synuclein pathology in R441G LRRK2-associated Parkinson's disease *J. Neurol. Neurosurg. Psychiatry.*
 16. Sánchez-Benavides G; et al. (2018) Brain and cognitive correlates of subjective cognitive decline-plus features in a population-based cohort *Alzheimer's Research and Therapy.* 10-1.
 17. Sánchez-Benavides G; et al. (2018) Distinct cognitive and brain morphological features in healthy subjects unaware of informant-reported cognitive decline *Journal of Alzheimer's Disease.* 65-1, pp.181-191.
 18. Bergeron D; et al. (2018) Prevalence of amyloid- β pathology in distinct variants of primary progressive aphasia *Annals of Neurology.* 84-5, pp.729-740.
 19. Tucholka A; et al. (2018) Structural connectivity alterations along the AD continuum: reproducibility across two independent samples and correlation with CSF A β and tau *Journal of Alzheimer's disease.* 61-4.
 20. Ramos-Campoy O; et al. (2018) Systematic screening of ubiquitin/p62 aggregates in cerebellar cortex expands the neuropathological phenotype of the C9orf72 Expansion Mutation *Journal of Neuropathology and Experimental Neurology.* 77-8, pp.703-709.
 21. Borrego-Écija S; et al. (2018) Tauopathy with Hippocampal 4-Repeat Tau Immunoreactive Spherical Inclusions in a Patient with PSP *Brain Pathology.* 28-2, pp.284-286.
 22. Vicente-Pascual M; et al. (2018) Variably protease-sensitive prionopathy presenting within ALS/FTD spectrum *Annals of Clinical and Translational Neurology.* 5-10, pp.1297-1302.
 23. Operto, G; et al. (2018) White matter microstructure is altered in cognitively normal middle-aged APOE-E4 homozygotes *Alzheimer's Research and Therapy.* 10-1.
 24. Oriol Dols-Icardo; et al. (2017) Analysis of known amyotrophic lateral sclerosis and frontotemporal dementia genes reveals a substantial genetic burden in patients manifesting both diseases not carrying the C9orf72 expansion mutation. *Journal of neurology, neurosurgery, and psychiatry.*

25. Borrego-Éciga S; et al. (2017) Frontotemporal Dementia Caused by the P301L Mutation in the MAPT Gene: Clinicopathological Features of 13 Cases from the Same Geographical Origin in Barcelona, Spain. *Dementia and geriatric cognitive disorders*. 44-3-4, pp.213-221.
