

Raffaele Cacciaglia, PhD

Publications

1. Cacciaglia R, Molinuevo JL, Falcón C, Arenaza-Urquijo EM, Sánchez-Benavides G, Brugulat-Serrat A, Blennow, K, Zetterberg H, Gispert JD (2020) APOE-ε4 shapes the cerebral organization in cognitively intact individuals as reflected by structural gray matter networks. *Cerebral Cortex*, 30(7): 4110-4120
2. Martí-Juan G, Sanroma-Guell G, Cacciaglia R, Falcón C, Operto R, Molinuevo JL, González Ballester MA, Gispert JD, Piella G (2020) Non-linear interaction between APOE-ε4 allele load and age in the hippocampal surface of cognitively intact individuals. *Human Brain Mapping*, in press
3. Vilor-Tejedor N, Operto G, Evans TE, Falcón C, Crous-Bou M, Mingüellón C, Cacciaglia R, Milà-Alomà M, Grau Rivera O, Suárez-Calvet M, Garrido-Martín D, Morán S, Esteller M, Adams HH, Molinuevo JL, Guigó R, Gispert JD (2020) Effect of BDNFVal66Met on hippocampal subfields volumes and compensatory interaction with APOE-ε4 in middle-aged cognitively unimpaired individuals from the ALFA study. *Brain Structure & Function*, 225(8): 2331-2345
4. Casamitjana A, Vilaplana V, Puch S, Aduriz A, López C, Operto G, Cacciaglia R, Falcón C, Molinuevo JL, Gispert JD (2020) NeAT: a nonlinear analysis toolbox for neuroimaging. *Neuroinformatics*, 18(4):517-530
5. Cacciaglia R, Costa-Faidella J, Grimm S, Zarnowiec K, Escera C (2019) Auditory predictions shape the neural response to stimulus repetition and sensory change. *NeuroImage*, 186, 200-210
6. Cacciaglia R, Molinuevo JL, Falcón C, Sánchez-Benavides G, Gramunt N, Brugulat-Serrat A, Esteller M, Morán, Fauria K, Gispert JD (2019) APOE-ε4 risk variant for Alzheimer's disease modifies the association between cognitive performance and cerebral morphology in healthy middle-aged individuals. *NeuroImage: Clinical*, 23:101818
7. Operto G, Molinuevo JL, Cacciaglia R, Falcón C, Brugulat-Serrat A, Suárez-Calvet M, Grau-Rivera O, Bragalló N, Morán S, Esteller M, Gispert JD (2019) Interactive effect of age and APOE-ε4 allele load on white matter myelin content in cognitively normal middle-aged subjects. *NeuroImage: Clinical*, 24:101983
8. Brugulat-Serrat A, Salavdó G, Operto G, Cacciaglia R, Sudre C, Grau-Rivera O, Suárez-Calvet M, Falcón C, Sánchez-Benavides G, Gramunt N, Mingüellón C, Fauria K, Barkhof F, Molinevo JL, Gispert JD (2019) White matter hyperintensities mediate gray matter volume and executive function relationship in cognitively unimpaired participants. *Human Brain Mapping*, 41(5): 1309-1322

9. Grau-Rivera O, Operto G, Falcón C, Sánchez-Benavides G, Cacciaglia R, Brugulat-Serrat A, Gramunt N, Salvadó G, Súarez-Calvet M, Minguillón C, Iranzo A, Gispert JD, Molinuevo JL (2019) Association between insomnia and cognitive performance, gray matter volume and white matter microstructure in cognitively unimpaired adults. *Alzheimer's research & Therapy*, 12(1):4
10. Petrone PM, Casamitjana A, Falcón C, Artigues M, Operto G, Cacciaglia R, Molinuevo JL, Vilapalna V, Gispert JD (2019) Prediction of amyloid pathology in cognitively unimpaired individuals using voxelwise analysis of longitudinal structural brain MRI. *Alzheimer's Research & Therapy*, 11(1):72
11. Cacciaglia R, Molinuevo JL, Sánchez-Benavides G, Falcón C, Gramunt N, Brugualt-Serrat A, Grau O, Gispert JD (2018) Episodic memory and executive functions in cognitively healthy individuals display distinct neuroanatomical correlates which are differentially modulated by aging. *Human Brain Mapping*, 39, 4565-4579
12. Cacciaglia R, Molinuevo JL, Falcón C, Brugulat A, Sánchez-Benavides G, Gramunt N, Esteller M, Moran S, Minguillón C, Fauria K, Gispert JD (2018) Effects of APOE-ε4 allele load on brain morphology in a cohort of middle-aged healthy individuals with enriched genetic risk for Alzheimer's disease. *Alzheimer's & Dementia*, 14(7), 902-912
13. Operto G, Cacciaglia R, Grau-Rivera O, Falcón C, Brugulat-Serrat A, Ródenas P, Ramos R, Morán S, Esteller M, Bargalló N, Molinuevo JL, Gispert JD (2018) White matter microstructure is altered in cognitively normal middle-aged APOE-ε4 homozygotes. *Alzheimer's Research & Therapy*, 10(1):48
14. Falcón C, Tucholka A, Monté-Rubio G, Cacciaglia R, Operto G, Rami L, Gispert JD, Molinuevo JL (2018) Longitudinal structural cerebral changes related to core CSF biomarkers in preclinical Alzheimer's disease: a Study of Two Independent Datasets. *NeuroImage: Clinical*, 19, 190-201
15. Sánchez-Benavides G, Grau-Rivera O, Cacciaglia R, Suárez-Calvet M, Falcón C, Minguillón C, Gramunt N, Gispert, JD, Molinuevo JL (2018) Distinct cognitive and brain morphological features in healthy subjects unaware of informant-reported cognitive decline. *Journal of Alzheimer's disease*, 65(1), 181-191
16. Sánchez-Benavides G, Grau-Rivera O, Suárez-Calvet M, Minguillón C, Cacciaglia R, Gramunt N, Falcón C, Gispert JD, Molinuevo JL (2018) Brain and cognitive correlates of Subjective Cognitive Decline-Plus features in a population-based cohort. *Alzheimer's Research & Therapy*, 10, 123-136 2017
17. Cacciaglia R, Nees F, Grimm O, Ridder S, Pohlack ST, Diener SJ, Liebscher C, Flor H (2017) Trauma exposure relates to heightened stress, altered amygdala morphology and deficient extinction learning: implications for psychopathology. *Psychoneuroendocrinology*, 76, 19-28
18. Cacciaglia R, Escera C, Slabu L, Grimm S, Sanjuán A, Ventura-Campos N, Ávila C (2015) Involvement of the human midbrain and thalamus in auditory deviance detection. *Neuropsychologia*, 68: 51-58.
19. Grimm O, Pohlack ST, Cacciaglia R, Plachta M, Demirakca T, Flor H (2015) Amygdala and hippocampal volume: A comparison between manual segmentation, Freesurfer and VBM. *Journal of Neuroscience Methods*, 253, 254-261

20. Pohlack ST, Nees N, Rutter M, Cacciaglia R, Winkelmann T, Schad LR, Witt SH, Rietschel M, Flor H (2015) Neural mechanism of a sex-specific risk-variant for posttraumatic stress disorder in the PAC1 receptor. *Biological Psychiatry*, 78(12):840-7
21. Winkelmann T, Grimm O, Pohlack ST, Nees N, Cacciaglia R, Dinu-Biringer R, Steiger F, Wicking M, Rutter M, Schad LR, Flor H (2015) Brain morphology correlates of interindividual differences in conditioned fear acquisition and extinction learning, *Brain Structure & Function*, 221(4):1927-19372014
22. Cacciaglia R, Pohlack ST, Nees F, Flor H (2014) Dissociable roles for hippocampal and amygdalar volume in human fear conditioning. *Brain Structure & Function*, 220(5):2575-86
23. Pohlack ST, Meyer P, Cacciaglia R, Liebscher C, Ridder S, Flor H (2014) Bigger is better! Hippocampal volume and declarative memory performance in healthy young men. *Brain Structure & Function*, 219 (1):255-2672012
24. Cacciaglia R, Nees F, Pohlack ST, Rutter M, Winkelmann T, Witt SH, Nieratschker V, Rietschel M, Flor H (2013) A risk variant for alcoholism in the NMDA receptor affects amygdala activity during fear conditioning in humans. *Biological Psychology*, 94:74-81.
25. Ridder S, Nees F, Lang S, Diener S, Wessa M, Kroll A, Pohlack ST, Cacciaglia R, Gass P, Schütz G, Schumann G, Flor H (2012) Brain activation during fear conditioning in humans depends on genetic variations related to functioning of the hypothalamic-pituitary-adrenal axis: first evidence from two independent subsamples. *Psychological Medicine*, 12:1-112011
26. Cacciaglia R, Krause-Utz A, Vogt MA, Schmahl C, Flor H, Gass P (2011) Voluntary exercise does not ameliorate context memory and hyperarousal in a mouse model for PTSD. *The World Journal of Biological Psychiatry*, 14:403-409
27. Pohack ST, Nees F, Liebscher C, Cacciaglia R, Diener SJ, Ridder S, Woermann FG, Flor H (2011) Hippocampal but not amygdalar volume affects contextual fear conditioning in humans. *Human Brain Mapping*, 33 (2):478-488
